

Semidol – pH Correction Media

- Effective media treatment for acidic water.
- Fast reacting pH corrector for low pH levels.
- Aids in the removal of iron & manganese and CO₂ removal.
- Created from naturally occurring dolomite, containing calcium magnesium carbonate oxide.
- Used in the treatment of drinking water, industrial processes and swimming pools.

<i>Semidol</i>	Value
<i>Size (mm)</i>	0.5 - 2.5
<i>d50-value (mm)</i>	1.75
<i>Density (g/cm³)</i>	3.33
<i>Bulk Density (kg/m³)</i>	1130
<i>Colour</i>	White
<i>Shape</i>	homogenous, porous, with rough surface free of fissures

<i>Chemical Analysis</i>	Mass % (Average)
<i>MgO</i>	23 - 28
<i>CaCO³</i>	72 - 77
<i>CaO free</i>	<1
<i>SiO²</i>	0.01
<i>Al²O³</i>	0.02
<i>Fe²O³</i>	0.05
<i>SO⁴</i>	0.03
